Junior Web Developer

Submit your application to be a junior web developer below, 14 February, 2024.

To become a junior web developer in our organization you must have:

Must have at least 2 years in this field of work.

Must be able to communicate between multiple people to work out solutions to problems.

Preferably be studying for a bachelors degree in web development, web design, or computer science.

Apply Here

An underlining issue occurred when I linked the apply now button to the application form. I managed to fix this by implementing another line of code into the button,

Here's what it was before:

```
<a href="form 1 (senior).html"
```

Here's after I added the extra code:

```
<a style="text-decoration:none" href="form 1 (senior).html"
```

To make the forms submit to a email I used this piece of code:

```
<form  
action="mailto:testburner123456789123456789@outlook.com"  
method="post" enctype="text/plain">
```

However, this does seem to work as it opens outlook automatically or preferred email service and fills the information automatically

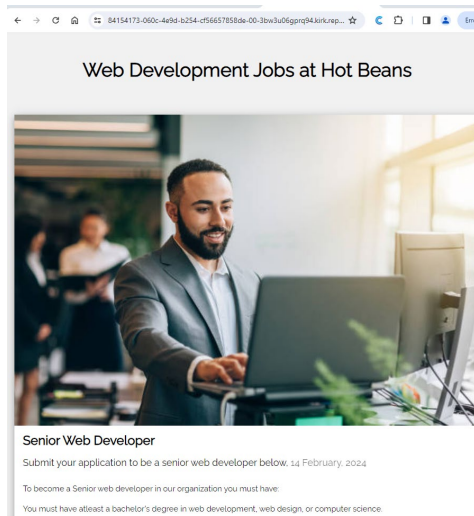

The screenshot shows a dark-themed email client interface. On the left, there is a 'Send' button with a right-pointing arrow icon. To the right of the button is a form with three fields: 'To', 'Cc', and 'Subject'. The 'To' field is filled with the email address 'testburner123456789123456789@outlook.com'. The 'Cc' and 'Subject' fields are empty.

Web browser testing

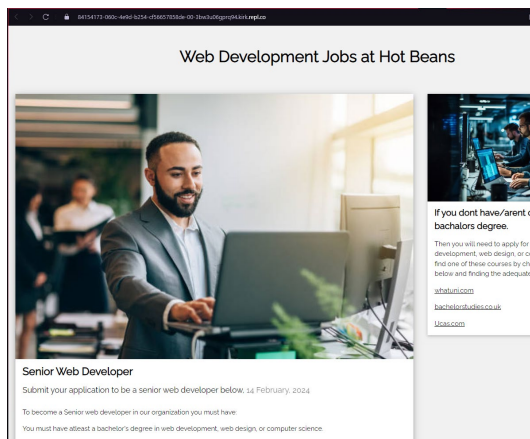

Chrome, The main page loads correctly.

The forms load and work correctly.

A screenshot of a web browser window in Chrome showing an application form. The title is "Apply here for our senior web developer position". Below the title, it says "Fill in the data below." The form consists of several input fields: "Full Name", "E-mail Address", "Position", and "Password". Below these is a "Gender" section with three radio buttons labeled "Male", "Female", and "Secret". At the bottom, there is a checkbox labeled "I confirm that all data are correct" and a blue "Register" button.

Opera, the main page loads correctly.

The forms load and work correctly.

I used the lighthouse tool to show how responsive my website is.

The report shows that the first contentful paint took 3.3 seconds and the largest contentful paint took 4.2 seconds. The speed index was 4.2 seconds and the cumulative layout shift was 0.199.
